Our new range of wireless ultrasound scanners (D8-series) converts each of your screens into a powerful ultrasound scanner. The light-weighted holder (220 g) is compact and presents a working time of 8 hours at full charge, wireless and compatible with Android, iOS (available soon) and Windows mobile on tablet, PC, smart-phone... With the interchangeable head system of the probes on the same holder, it is very easy to take with you a full range of probes for ultrasound scanning. Available: Doppler (colors) and Black & White
